EDUCATION

Concordia University

B.Eng. Software Engineering

Sep 2025 – Present

EXPERIENCE

Rumy

Co-Founder / CTO

Dec 2025 – Present

Remote

- Building a roommate-management mobile platform for chores, expenses, supplies, bookings, and shared household expectations.
- Leading product strategy, user research, UI/UX design, and full-stack development from concept through validation.
- Secured startup backing and mentorship from LvlUp Ventures and its community partner network.

Meta x MLH

Production Engineering Fellow

Jun 2026 – Aug 2026

Remote

- Developed production engineering skills across Linux, networking, system architecture, scripting, and reliability.
- Built and improved open-source systems in simulated production environments focused on performance and scalability.
- Collaborated through Git, code reviews, agile workflows, monitoring, debugging, and post-mortem analysis.

Athena AI

Software Engineering Intern

Mar 2025 – May 2025

Montreal, QC

- Contributed to Athena AI, a fast-growing startup with 3M+ users, building and shipping React + TypeScript features.
- Lifted model accuracy from 74% to 92% by building Python pipelines to analyze and cluster failure cases.
- Closed 31 of 40 recurring production tickets through log-based root cause analysis and targeted fixes.
- Supported live product demos at World Summit AI, contributing to increased partner support and user interest by 15%.

PROJECTS

Before You Go – Pediatric VR Simulator | Unity, C#, OpenXR, Meta Quest 3

Mar 2026

2nd Place – CareXR Hack · Solo

- Built a fully interactive Meta Quest 3 VR application in 48 hours with 2 complete medical simulations.
- Resolved OpenXR conflicts by engineering a modular XR system enabling stable multi-scene execution.
- Improved simulation usability by applying hospital-based design principles to reduce cognitive load.

Underdog – Sports Betting Recovery App | React Native, TypeScript, Expo

Mar 2026

3rd Place – BuildFast Hackathon · Solo

- Built and shipped a complete mobile app in 48 hours including onboarding, tracking, and feedback systems.
- Differentiated product by targeting a niche recovery market through financial discipline UX design.
- Placed 3rd overall as a solo developer among teams based on execution speed, product clarity, and usability.

SKILLS

Languages: TypeScript, Python, Java, JavaScript, C#, Dart, SQL

Technologies: React, React Native, Node.js, Firebase, Flutter, Unity, MongoDB, Git, Expo

Focus: Startups, AI Applications, Mobile App development Full-Stack Development, Game Development
