EDUCATION

Concordia University

B.Eng. Software Engineering

Sep 2025 – Present

Collège de Maisonneuve

DEC – Computer Science, Application Development

Aug 2022 – May 2025

EXPERIENCE

Meta

Production Engineering Fellow

Jun 2026 – Aug 2026

Remote

- Selected as a Meta Production Engineering Fellow, developing core PE and SRE skills across system architecture, Linux internals, network protocols, and scripting.
- Worked on open-source projects and simulated production environments focused on improving system performance, reliability, and scalability.
- Collaborated with industry mentors and peer engineers using Git version control, code reviews, agile workflows, and post-mortem analysis.

Athena AI

Software Engineering Intern

Mar 2025 – May 2025

Montreal, QC

- Contributed to Athena AI, a fast-growing startup with 3M+ users, building and shipping React + TypeScript features.
- Reduced UI re-renders by 28% by redesigning state flow and applying memoization across 3 core modules.
- Lifted model accuracy from 74% to 92% by building Python pipelines to analyze and cluster failure cases.
- Increased high-confidence AI responses by 22% through prompt tuning and response validation improvements.
- Closed 31 of 40 recurring production tickets through log-based root cause analysis and targeted fixes.
- Supported live product demos at World Summit AI, contributing to increased partner support and user interest by 15%.

PROJECTS

Before You Go – Pediatric VR Simulator | Unity, C#, OpenXR, Meta Quest 3

Mar 2026

2nd Place – CareXR Hack · Solo

- Built a fully interactive Meta Quest 3 VR application in 48 hours with 2 complete medical simulations.
- Resolved OpenXR conflicts by engineering a modular XR system enabling stable multi-scene execution.
- Improved simulation usability by applying hospital-based design principles to reduce cognitive load.

Underdog – Sports Betting Recovery App | React Native, TypeScript, Expo

Mar 2026

3rd Place – BuildFast Hackathon · Solo

- Built and shipped a complete mobile app in 48 hours including onboarding, tracking, and feedback systems.
- Differentiated product by targeting a niche recovery market through financial discipline UX design.
- Placed 3rd overall as a solo developer among teams based on execution speed, product clarity, and usability.

Better Call Saul AI – Legal Assistant | React, TypeScript, AI APIs

Jan 2025

Winner – ConUHacks IX

- Led a 4-person team to build a bilingual AI legal assistant in 24 hours, leading to a win.
- Achieved 90%+ accuracy by integrating speech recognition and translation pipelines across French and English.
- Delivered a real-time AI demo recognized for usability, originality, and real-world impact.

SKILLS

Languages: TypeScript, Python, Java, JavaScript, C#, Dart, SQL

Technologies: React, React Native, Node.js, Firebase, Flutter, Unity, MongoDB, Git, Expo

Focus: Scalable Systems, AI Applications, Performance Optimization, Full-Stack Development, Game Development
